

## 1 Plug It In

## 2 Log In Online

## 3 Begin Watching Your Camera

**You Are All Set!**

**A three-step installation process makes this video surveillance solution a snap.**

## Cloud-Based Video Hosting

Consumers & Small Business

### Simple to set up, yet powerful cloud-based video surveillance

IvedaXpress is a simple, yet powerful surveillance solution for your home, office or business on-the-go. This portable, plug and play solution consists of Axis cameras and Iveda Solutions cloud-based video surveillance services. Together, they provide an inexpensive and easy to install enterprise level surveillance solution. Especially designed with consumers and small businesses in mind, IvedaXpress eliminates the many hours of network setup and upkeep.

A three-step installation process makes this video surveillance solution a snap. Simply plug it in, log in online and begin watching your cameras from any Internet-enabled device from anywhere.

- Portable, plug & play
- No software to install (Web Based)
- No recording device required (DVR)
- 24/7 access to live & archived video
- Only camera, Internet & power are needed

### Simple Surveillance Solution (Home, Office, Business On-the-Go)

- One login, one Web browser
- Secure remote data storage
- No DVR to get stolen or destroyed
- Cost effective economical pricing and service plans
- Video is viewable on iPhone or Android through HVR Mobile

### With Iveda Xpress you don't have to worry about:

- Network configuration or router compatibility
- Using static IP address or dynamic DNS
- Changing firewall configurations

## Off-Site Video Hosting and Archiving

IvedaXpress is supported by best-in-class, secure, remote, data center with fault-tolerant infrastructure designed for high reliability, availability, and security. Since the video data is stored remotely, there is no need for a local recording device and no concern for connectivity or disruption of mission critical video data. Remotely stored video eliminates the risk of video footage being destroyed or stolen. Additionally, off-site video hosting and archiving allow multiple simultaneous users to access their video data remotely – whenever and wherever they need it most.

User-friendly, Web-based centralized camera management system

## One login, one interface to multiple cameras anywhere in the world

- Anywhere, Anytime from Internet-accessible Devices
- Web-based, 24/7 Remote Live & Archived Video Access
- Centralized, Multiple Simultaneous Access
- Secure, High Reliability & Availability
- Fully Fault-Tolerant Data Center

## 24/7 Remote Simultaneous Access

Typically, only one to two simultaneous remote users can access a camera directly before the video quality begins to deteriorate due to bandwidth limitations. However, with Iveda Solutions' cloud-based video hosting service, multiple users from disparate geographical locations are able to simultaneously access the same camera without degradation of video quality.

From one camera at home to hundreds throughout the world, each camera can be accessed 24/7 through one secure login from any Internet-enabled device anywhere. Iveda Solutions enables a seamless user experience limited only by each user's Internet connection.

This service is ideal for public safety and community watch applications where multiple first responders (residents, property managers, police, etc) may want to access certain cameras to coordinate an immediate response to an ongoing criminal activity or emergency.

## Minimum Requirements

- AVHS-enabled Axis Camera
- Broadband Internet
- Power

That's it! No servers to host, no DVRs to record video, and no software for video access. Live and recorded video are accessible 24/7 using a web-browser from any Internet-enabled device. It's simple and secure. Just like accessing online banking.

## Optional Network Attached Storage

IvedaXpress also leverages Iomega® network attached storage (NAS) devices providing users the ability to select different recording and retention policies for both on-site and off-site video files while maintaining remote Internet access. The solution enables businesses to leverage the power and cost effectiveness of cloud services while still allowing them to grow their infrastructure without requiring the need for expensive and complex DVRs.

- Provides back-up storage in the event Internet connectivity is lost
- Reduces bandwidth requirements
- Enables higher camera counts while still leveraging the cloud
- Record higher video frame rates and high definition resolutions on certain camera models
- Inexpensive storage
- Scalable to match your systems needs with 2, 4 and 6TB capacities available

*Enhance system performance - Stream low resolution video to the cloud and store high performance video on-site*

## SAFETY Act Designation

Iveda Solutions has been approved as a Qualified Anti-Terrorism Technology provider under a formal SAFETY Act Designation by the Department of Homeland Security (DHS). This federal law provides unprecedented immunity, liability caps, defenses and other incentives available to private or governmental entities who use products, technologies or services that have been SAFETY Act Designated.

Under the Act, a terrorist act is defined as:

- Criminal activity
- Injury or harm to a person
- Malicious attacks

SAFETY Act Designated
